

João Omar Andrade

SOFTWARE ENGINEER

With one year of experience, mainly focused on backend development. I have significant experience with Node.js and .NET environments. My focus is on creating modern and efficient web applications while applying best development practices.

WORK EXPERIENCE

Web Developer / 2M Engenharia

NOV 2023 - MAR 2024 / Freelance, remoto

After my experience as an administrative assistant at 2M Engenharia, where I observed problems in employee management, I decided to address these issues by developing a system.

The system was designed to resolve the chronic problems identified, significantly enhancing the organization, accessibility, and efficiency of data and document management. Additionally, I implemented scraping functionalities for automatic data integration with partner companies, facilitating and optimizing information sharing. This system reduced the time spent on such operations by at least 80%.

Stacks:

TypeScript, NextJS, NestJS, Puppeteer, PostgreSQL, Google Cloud.

IT Administrative Assistant / Luxottica

AGO 2023 - SET 2023 / Salvador - BA

As an IT administrative assistant at Luxottica, I played a crucial role in training employees for a new system that the company was migrating to. My responsibilities included learning the system and teaching its operations. I was responsible for creating training materials, conducting training sessions, and providing ongoing support to ensure effective adoption of the new system. This experience strengthened my communication skills and ability to share knowledge.

Administrative Assistant / 2M Engenharia

DEC 2022 - MAR 2023 / Salvador - BA

As administrative assistant at 2M Engineering, I was responsible for supporting the employee onboarding and offboarding processes. My role primarily involved managing documents and data related to these operations. I contributed to organizing files, preparing reports, and maintaining employee records. This experience has provided me with insights that could serve as a foundation for future ideas aimed at improving and optimizing administrative processes within the company.
